The Board wishes to have an electronic recording made of their board meetings for the public to view on the Lee’s Summit Schools website and YouTube channel.

The Chair of the meeting (normally the Board President) shall be entitled to stop the recording at his signal if he determines that the morals of a potential viewer will be jeopardized or if slanderous comments are made about an individual or entity.

The Board envisions one camera in the rear of the room focused on the Board Members and staff on the dais, with an ability to obtain “close up” shots on speakers as they speak. One camera is also envisioned in the front of the room to focus on the public speaker rostrum. Appropriate audio equipment may be required to be utilized in order to provide clear audio of individuals who are permitted to speak at the meeting.

The recording must be subject to editing if the President or the Board determine that it includes any inappropriate words or actions by a public speaker. The recording will be subsequently broadcast over the Lee’s Summit School website and YouTube channel periodically until the next meeting is available for broadcast. The recording must also be reproducible for copies under the Open Public Records Act.

The Board will rely upon the expertise of the videographer in determining the video and audio setup and provision of a “sample” demonstrating video and audio clarity; wide scan and ability to focus; and general quality of recording for broadcast will be helpful. The District may provide access to the Board Chambers for purposes of producing such a “sample”.

Cinematic Visions has had the privilege of working with the LSR7 School District on the filming of the Board of Education meetings, since the December 2016 meeting. If selected again, the School District can expect the same professional quality services, provided by professional people using the best, most reliable equipment in the industry.

For each meeting, Cinematic Visions will continue to arrive well ahead of the scheduled time to set up and test the functionality of all the equipment utilized in the recording of the meetings. Break down of all equipment will take place once the meeting is completed and the viewing public has vacated the facility.

In the two and half years of providing this service, we have not had one absence, or any technical issue that prevented the recording and publication of the meetings to YouTube or the City's public access channel. Thus, Cinematic Visions feels as though our techniques are tried and true to this point, and we feel very comfortable stating that we expect this consistency to continue - and so should the school district.

Cinematic Visions will provide up to three people for each meeting. This will include a Director / Producer, who instructs the two camera people to film any and all pertinent discussions taking place with the most optimal angle and focus. In addition, any and all presentations will be included in the filming and production of the videos. This includes powerpoints, videos, etc.

Having filmed nearly 30 of these meetings over the years, gives us the unique experience to know what to expect and how to ensure it is recorded, preserved and distributed. However, if the board or school district would like to see anything done differently or presented in a new way - Cinematic Visions' years of experience in other projects for companies - provides us with the ability to adjust as needed, and the know how to do it, including live streaming.

Communication has been done via e-mail, phone calls and in person meetings during the previous contract with the District - and if there are no objections - we would be happy to continue in the same way. Our physical location is less than 2 miles from the Stansberry Leadership Center - so being able to come to the meeting location for additional testing and input has been no problem - and we are happy to offer that service again as well.

If selected, we are happy to follow the proposed implementation of the contract, and can continue providing services with no interruption in the same fashion we have been doing. As we have done previously, we will work to provide our best solution for the District - so others involved in the meetings can concentrate on the work before them - and not have to worry about the filming and production of the Board of Education meetings.
